

The fundamental pillars of the French campaign on Muslim Mali

By

Sheikh Abu Abdul Ahmed Al-Jijeli

-my Allah preserve him-

بسم الله الرحمن الرحيم وصل اللهم وسلم على سيدنا محمد وآله وصحبه أجمعين

The French crusade against Mali still cast a shadow on the region, and its aftershocks still repeats in the neighboring countries, to reveal the truth of the campaign and the parties participating in it, and the nature of this participation according to each state, for every Muslim in Mali and its surroundings to be aware that he is a goal of a systematic crusade that seeks to eradicate Islam as a whole not just Qaedat Al-Jihad and its sisters, as have been promoted by the languid local media or the global one which is accomplice with the invaders, except for a few evenhanded who are almost not heard.

A study conducted by one of the French strategy studies centers¹ in the beginning of the current year, referring to the similarities between north Mali and Afghanistan, and warning

¹ (IRIS) institution

from repeating the mistakes of America there, fearing from another defeat before the soldiers of Islam to be added to the five wars lost by the crusaders in Afghanistan in the past centuries, in a clear reference to the three defeats of Britain and the Soviet defeat as well as the current American defeat which only waits for it to be signed in Kabul or Kandahar.

The report says that the first mistake committed by America and copied by France is depending on the aerial bombardment in Afghanistan and Mali alike, which pushed the Afghan people to the hands of the Taliban and it's about to push the Azawadi people to the rank of the mujahidin and that's why the report recommends to avoid aerial bombardment for a long period and repeatedly and extending the hands of friendliness to the tribes of the region, so that it become sluggish and loses the feeling of the impact of the occupation in its daily lives, and here comes the role of the Ulema of the Ummah and its intellectuals to educate the Ummah and inspire the spirit of resistance in it and prohibit the cooperation with the occupation.

As for the second mistake – according to the same report – it is the Americans always leaving the Taliban an opportunity to renew its power in the tribal regions of Pakistan which made France to impose a role in this aggressive war on all the states of the region and in particular in the neighboring countries, Algeria, Mauritania, Niger and Burkina Faso which makes us urge the Muslims in the countries neighboring Mali to support their brothers and sons the mujahidin in Mali, to thwart the siege imposed on them with the participation of the local armies the protector of the thieves the Almighty says: (and if they seek aid from you in the matter of religion, aid is incumbent on you) 72 Surah Al-Anfal.

The third mistake is in depending on the illegitimate Afghan government which made the investments and projected directed towards the Afghan people pour in the pockets of the corrupt politicians and the complicit Western cooperators, which makes it imperative on the French government that it seeks to deliver the medical and food and in-kind aid, to the downtrodden classes directly through the medical teams of the French army or the elders of the

tribes who are trusted among their tribes, and that is extremely dangerous if our people in Mali didn't pay attention to it, since this aid will only be the favor of Pharaoh on the children of Israel as Mousa peace be upon him said when he addressed that arrogant tyrant (And is it a favor of which you remind me that you have enslaved the children of Israel?) 22 Surah Ash-Shuara, so is that a favor which the French occupation reminds our people in Mali that killing their men and violating their honors and plundered their riches and corrupted their religion, then it gives them a crumbs which most part of it will pour in the pockets of the corrupt local politicians and the occupiers.

The fourth mistake is in the American army isolation behind the walls of its military bases, which led to the isolation of the American army from the sources of information and turned these bases to an easy prey for the mujahidin – or the insurgents as the report described them – every night, this situation resulted in a terrible mental illness and cases of depression as a result of pressure daily which the American soldier is exposed to, which makes it imperative on the French army to avoid this isolation and depend on the policy of rapprochement to the population in general and mixing with its different components and that is the secret of the success of the French occupation of the African continent.

Yes, mixing with the occupier makes the feelings obtuse from the occupation and engenders the possibility to being colonized, then as time passes it turns to total loyalty and support it with the soul and precious against the people and relatives, the people of our religion and kindred, and those who mix with the occupier turn to a dagger in the side of the Ummah, who subject it to severe torment under the uniform of the aggressive occupier, and those new hypocrites today are more dangerous on our people in Mali from the occupier itself, because they are its eye which they see with and his legs which they walk with and its ears which hear with, and here comes the role of the sincere Ulema to revive the meanings of loyalty to the mujahid believers before the sanctity and religion and disowning from the aggressive occupying Kuffar, and that was implemented in the best way in the face of the French crusade in Mali by the

famous statement of the Ulema of Chinguetti who criminalized the occupation and prohibited to deal with it or support it in any kind of support, which is a honorable stance that will be written with golden water on the honorable pages of the history of our Ummah.

Then the report comes to the American sixth mistake is lateness in forming a local Afghan army that fights instead of the occupier and plays the role of the minesweepers in the campaigns against the mujahidin, and that is indeed what the French army is doing on the ground, it began some time ago in preparing special Mauritanian forces equipped with modern weapons and night visions to track the convoys of the mujahidin in the Great Sahara, also the Chadian army has excellently played the role of the minesweeper along with the cheap armies of the West African states, but it is a short living stratagem, because the longer war will drain the occupier and his lackeys all together Allah willing, and France won't be able to protect its interests that are distributed on millions of kilometers by all the African armies from the convoys of martyrdom seekers who are eager to death as the French and their agents are keen to life.

The seventh mistake which ended the report, the declaration of Barak Obama the date of the withdrawal in 2014, "and there is nothing harmful on the (legitimate?) forces than this declaration that weakens its resistance, and any such declaration by the French forces will directly lead to collapse, there should be confidentiality and concealment about that issue, and even concealing our true goals, and we saw how our declaration about the Rafale warplanes passing through Algerian airspace affected Bouteflika and the wing that supports the convergence with France, because that is considered an inversion in the policy adopted by Algeria to this day which is a mistake that shouldn't be repeated in the future that might be hiding for us a bitter and long war, when we will need a large land force despite of the presence of the African forces on our side, and that is what will make us pose a valid question. who will finance the war?", then the report answers "certainly our European friends who are happy for our intervention instead of them will keep their hands in their pockets to finance this

campaign, and to convince the European public opinion of the feasibility of this war we should reassure on the deterioration of the security situation on the southern shores of the Mediterranean and that the danger is approaching to our borders, yesterday our forces were fighting in Afghanistan 7000 km from our borders and today we are fighting 3000 km from France and 2000 km from France which means that the danger is approaching to us day after day, then we shouldn't forget that our presence in the Sahel is basically to prevent that danger from reaching the countries Arab Maghreb"... it is the logic of aggression rooted in the worshipers of the cross, so will the Muslim be aware of this reality to be freed from the chains of fear and the attraction of the eight idols that prevented this Ummah from returning to its historical role as an Ummah with a message, it lives and dies on it, and makes jihad for its sake, and meets Allah on it, and we ask Allah that that be near (and Allah is the master of His affair, but most people do not know) wa Alhamdulillah Rabbi Alalameen.
